

TECHNOLOGY THAT'LL MAKE A SPLASH IN YOUR PRACTICE

- **Eliminates water contaminants**
Flash vaporizes tap water to kill and remove 99% of most contaminants.
- **Protects your equipment**
Aquastat produces the highly pure water necessary for autoclave sterilization in your office.
- **Fast distilling/energy efficient**
It processes 3.78 litres (1 gallon) of distilled water in just 4.25 hours with very low power consumption.
- **Safe, purified water from any source**
Whether your water source is spring fed, municipally piped, soft or hard, the Aquastat assures you of fresh, safe, purified water every time.
- **Portable and easy-to-use**
No special wiring or plumbing required – just plug it in! And Aquastat is easily portable at just 4.5 kg (10 lb.).
- **Removable boiling chamber**
For ease of use and cleaning.
- **Special heating base**
A uniquely designed heating base reduces scale buildup.
- **New design**
A new contemporary design compliments any office decor.

AQUASTAT

AQUASTAT

THE PUREST WATER IN A SEA OF TECHNOLOGY

- Flash vaporization
- Condensation
- 99% Pure water

Weight: 4.5 kg (10 lb.)

Dimensions: 40.6 x 24.5 x 38.4 cm (L x W x H)
(16 x 9 5/8 x 15 1/8")

A new wave breakthrough provides 99% pure, fresh water

Protect your patients and your STATIM autoclave by using only pure, fresh water in your practice. SciCan's AQUASTAT distiller allows you to forget about buying expensive bottled water or risking damage to your equipment from less than pure distilled water. A patented distillation technology kills harmful bacteria and viruses by flash vaporizing water and then reconstituting it through condensation. The result is water that's 99% pure. So pure, you could even drink it!

AQUASTAT purifies soft or hard water from any source including those that are spring fed or municipally piped. Simply plug it into any 110V outlet, fill with tap water and switch on. Safely and effectively it will remove lead, copper, aluminum, arsenic, iron, nitrates, herbicides, pesticides, PCBs and more!

With its energy efficient technology, AQUASTAT purifies 3.78 litres (1 gallon) of water in just 4.25 hours. Combine this fast process with a compact, light-weight design that doesn't require any special plumbing or wiring – and you'll have all the fresh water you need.
